

# ENRICHING QUALITY OF LIFE, THROUGH SAFE HEALING ENVIRONMENT

*Godrej* **interio**

HEALTHCARE

# HEALTHCARE AND US

Godrej Interio Healthcare business focuses on creating environments that support patients and families in the process of healing. These healing environments focus on **efficiency, empathy** and **wellbeing** of all stakeholders: Patients, Caregivers and Doctors.

Our aim is to transform healthcare spaces to promote a **safe healing environment**. We believe that healing environments should focus on patients and their relatives, help caregivers to be efficient and make doctors comfortable. This is achieved through various design approaches for products and space. Godrej Interio's Healthcare highlights our design philosophy, which is based on adopting a **Human-centric approach** and using **adaptive space solutions** for improved patient-doctor interaction.

We bring our knowledge of office space design to create people-centric spaces in areas of canteen, offices, lounges and waiting areas, meeting and video conferencing rooms and designing storage solutions. We can deliver a complete healthcare space with designing, interior fitouts and furniture that can meet various budgets.

Our Healthcare furniture products are ISO 13485 certified, USFDA registered and rated for CE certification from the European notifying body.

We design new perspectives to reality.

Space is our playground and it's our endeavor to make life the winner, everywhere and every time.

**Godrej Interio. Make space for life.**

# OUR STUDIES

The important driver of space design is the study of workflow for various stakeholders. Our recent study revealed that CAREGIVERS who are important stakeholders in patient healing are walking 8-10 km in 8-hour shift due to incorrectly designed spaces. Some more insights from our research are as below:

## Insights from whitepaper

- a) More than 90% complain of some MSD (musculoskeletal disorder)
- b) Most prevalent pain areas amongst the nursing staff were leg pain (56%), followed by knee pain (51%)
- c) 51% complained of upper and lower back issues
- d) 61% also experienced neck pain sometimes
- e) 41% found to have taken leave for 1-3 days, whereas 7% of nurses have taken leaves for 4-6 days in a span of two months to manage the pain, indicating a clear productivity loss to the organization

# MOTIVATED BY CHALLENGES

Our motivation for creating a safe healing environment stems from the expectations of the caregivers. Each day they strive hard to provide superior healthcare services to their patients.

These challenges faced by them help us in the design and development of an intuitive, dynamic and ergonomic healthcare product range.

Thus, we play the role of facilitators of care and as a support system that supplements the treatments. We believe in creating a well-planned healthcare environment, which is safe and benefits the caregivers as well as, the patients.

# DESIGNED FOR MULTIPLE AND SPECIALIZED USE

The responsibility of our design team isn't limited to improving the established solutions. It goes beyond creating products that take care of key customer needs, common to a variety of healthcare environments. Thus the team makes certain that these products have multiple-use while being specialised for special tasks.

## Parameter for designing the products:

### Global Safety Standards

We adhere to the most stringent global standards and quality certifications. On the basis of which, we make sure all products are created to have –

- No sharp edges, no electrostatic charge
- No cold shock
- All entrapment zones taken care of
- Fall protection

### Uncompromised Comfort

We believe a safe healing environment is when the patients, as well as caregivers, experience comfort. To make sure there is no compromise on comfort and care for all concerned, we provide –

- Easy-to-use controls/crank handles
- Ergonomic design
- Easy maneuverability
- Compatibility with associated products and surroundings

### Assured Hygiene & Easy Maintenance

Our products take care of hygiene and maintenance too. The products are protected with bacteriostatic powder coating that ensures infection control, better pre-treatment procedure. At the same time, the simple construction ensures easy access for cleaning and fumigation.

# GODREJ INTERIO: HOLISTIC DESIGN AND SOLUTIONS

We create safe healing environments that work in harmony towards patient recovery, incorporating a complete healthcare system.

We stress on creating facilities that promote wellbeing through interior designs that emphasise professionalism and medical expertise. In addition, these facilities bring about an international feel through improved workflow patterns and processes.

Our design team comes with years of practical experience and exposure to every interior, HVCA, electrical and plumbing design. They also have experience in working processes as builders and installers.

## About us:

Godrej Interio (GI) is India's premium furniture brand in both home and institutional segments with a strong commitment to sustainability and centers of excellence in design, manufacturing and retail.

Led by the largest in-house design team in the country in the furniture category and awarded with 34 India Design Mark Awards till date, GI aims to transform spaces with its thoughtfully designed furniture to create brighter homes and offices with products that have the highest design quotient in aesthetics, functionality and technology. With consistent pursuit of excellence and a special focus on health and ergonomics, GI's product portfolio comprises a massive range.

Today, we design and manufacture furniture for office spaces, homes, educational institutes, healthcare facilities, laboratories and more. Along with furniture we offer Audio Visual and 360 Degree Turnkey solutions. Each of our product range revolves around comfort and aesthetics while delivering well-designed, fun and functional furniture solutions. Briefly, Godrej Interio transforms dream spaces to life!

Godrej Interio has 8 manufacturing facilities situated at Mumbai, Haridwar, Shirwal, Khalapur and Bhagwanpur. GI's Shirwal Plant is GreenCo Platinum Certified and Mumbai Plants are GreenCo Gold Certified. GI is widely known for its comprehensive sustainability certifications for its products in furniture category.

GI's commitment to the environment has resulted in manufacturing products with lesser environment footprint. Our pioneering efforts include designing less environment burdening products, usage of eco-friendly materials and setting up less polluting and consuming processes, ensuring eco-friendly packaging, and transportation and finally the extended responsibility of recycling/reuse of used furniture and scrap, thus ensuring a lifecycle approach to green. GI has the widest range of green choices for our customers, which not only includes products but also services such as green interiors and recycling.

Currently present in over 650 cities with 300+ exclusive showrooms and 1200 dealers, GI is one of the largest divisions of Godrej and Boyce Mfg. Co. Ltd., part of the Godrej Group, one of India's largest engineering and customer product groups.
